

Subject Intent Statement
Construction
<p>The construction department offers students the opportunity to explore a broad range of practical projects, learning skills in each such as measuring and marking, joining timber, tool mastery, handling and using paints and plumbing in a sink. They will discover creative and ingenious ways to learn about construction through hands on, practical projects. A mentality of safety will develop through safe practices and the informed use of personal protective equipment. Pupils will build confidence through adapting and learning how to overcome barriers and find alternative methods to achieve success. Pupils will improve fine and gross motor skills through developing technique and having the opportunity to practice them.</p> <p>Pupils will acquire knowledge and experience which will connect to and inform post 16 and career visions and options and achieve a NCFE Level 1 Certificate in Occupational Studies for the Workplace.</p>
