

Subject Intent Statement
Science
<p>At Sunrise Academy, Science curriculum is aimed at building up substantial levels of scientific knowledge. In this case both quality and quantity of said knowledge matter. Sunrise students are provided with range of options for acquiring this knowledge. An important part of the educational process within science is assessment of the knowledge acquired by the students, as the final goal of education is not knowledge itself, but knowledge being tested, and respective qualifications being awarded to the students. This way students have opportunities to not only get the knowledge but acquire tools that will be beneficial for the students in their future life, whether its further education or employment.</p> <p>The first SENDAT value is teaching and learning. At Sunrise, a high priority is set for the academic integrity and students are taught the respect towards “Academic Honour Code” by the staff. Where possible, British values, SMSC and Gatsby Benchmarks are embedded into the science curriculum to allow students develop into well-rounded personalities.</p>
